

7.7 billion plastic bottles purchased annually in the UK

Starcross Yacht Club is no longer going to be part of those sales for non-reusable water bottles.

From now on we do not stock water in bottles.

Many of you will already have your own favourite water container.

The Club now stocks a few re-usable water containers with an easy-to use, single handed “twist and sip” operation so you can keep one hand on the tiller. Capacity is 600 ml.

They are dishwasher safe.

The containers are made from recyclable Polyolefin, a food-grade material, and contain no Phthalate or BPA. They are pliable to

enable “squeeze drinking” and cannot break if dropped.

Available from the galley service window, they cost £4.00 each. Fresh drinking water is available from the tap between galley and race box.

Full cleaning instructions are available from sistema Twist 'N' Sip products.
